ENDOSTM

- € 360 degrees rotation of the shaft
- € Ergonomic firing handle
- € Reinforced and fixed anvil, atraumatic tip, 6 rows of staples - high anastomoses performance and clear graduation
- € Reload with easy connection - new blade everytime the reload is changed
- € Articulation button - 30° and 45° degree articulation
- € High resistance body - texturized to improve grip
- € Safety button
- € Orange retaining button

ULTRAENDOS™

€ Integration designing of the orange return nob - reset more easily

€ Special processing of anvil surface . firing easier

€ Wider proximal-to-distal jaw opening for easy tissue positioning and manipulation

€ Generates less stress on tissue during compression and gripping

€ 90 degrees turn around the joint - easy to reach the complex surgical site, help to complete the difficulty operation

€ Joint it's only 2.5 cm from the proximal end of the cartridge - increases the flexibility in small places

€ Low profile anvil design to allow easy entrance of the instrument and minimize the tissue dissection
